TO : Chairman, Projects Review Committee
FROM : Deputy Executive
SUBJECT : Assistant Director for Special Operations
RE : Request for Enlarged Fuel Storage Capacity at the Base Radio Station, [REDACTED]

25X1A

Pursuant to Administrative Instruction [REDACTED], it is requested that funds in the amount of \$29,000 be provided and authority granted for their expenditure for the purpose of enlarging the diesel and motor fuel storage capacity at the Base Radio Station [REDACTED]

25X1A

ILLEGIB

[REDACTED]

The existing diesel fuel storage capacity will sustain the operation for 25 days. Shipping strikes, wartime shipping and other factors may cause the frequent replenishment of this fuel supply to become extremely difficult. Since the station's power is entirely dependent upon its diesel driven generators, the supply of fuel oil is vital to its operation. It is proposed storage facilities be increased to provide a six months supply. Based on current U. S. tank and installation costs, the 100,000 gallon fuel oil and 2,000 gallon gasoline tanks and may be provided for approximately \$29,000.

Since funds were not provided for this expenditure in the Communications Division budget, it is recommended that the Director transfer unvouchered funds to the Communications Division for this project.
